Microsoft® Outlook® for Office 365™ : Part 2

About This Course:

In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with

calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items. In short, you'll work with a wide range of features and options and, in so doing, understand why Outlook is a leading personal management system.

Course Objectives:

- Insert objects in messages, and modify properties and global options.
- Organize, search, and manage messages.
- Protect your mailbox and manage its size.
- Use rules and Quick Steps to automate message management.
- Work with advanced calendar settings.
- Import and forward contacts.
- Assign delegate permissions and share Outlook items with others.
- Archive and back up Outlook items using data files.

Audience:

- Office professionals who already use Outlook and want to enhance productivity.
- Administrative assistants and project coordinators managing shared calendars and inboxes.
- Team leaders and managers who delegate tasks and schedule across teams.
- IT support or operations staff responsible for Outlook maintenance and backup.

Prerequisites:

- To ensure your success, you should have end-user skills with any current version of Windows, including being able to start and close applications, navigate basic file structures, manage files and folders, and access websites using a web browser. Additionally, it will benefit you to have basic Outlook skills.
