Course Duration: 8 Hours

Microsoft Project 2021 : Part 2

About This Course:

Microsoft Project 2021 is a powerful tool that enables project managers and teams to effectively plan, execute, and track projects of all sizes. This hands-on course teaches participants how to update project plans, generate dynamic project views, create status reports, reuse project data, and work with multiple projects efficiently.

Course Objectives:

- Update and maintain an active project plan

- Generate different views to track progress, resources, and timelines

- Create professional reports to communicate project status

- Reuse existing project data to save time and standardize processes

- Manage and consolidate multiple projects within MS Project 2019

Audience:

- Project managers, coordinators, and team leaders

- Professionals responsible for tracking and reporting project performance

Prerequisites:

- A basic understanding of project management principles (e.g., tasks, milestones, dependencies)

- Working knowledge of Microsoft Windows and Office applications

- Microsoft Project 2021 installed for hands-on practice

Course Outline:

- Introduction to MS Project 2019

- Updating a Project Plan

- Generating Project Views

- Creating Project Reports

- Reusing Project Information

- Working with Multiple Projects
