Difficulty: Advanced

Course Duration: 3 Days

Python® Programming: Advanced (LO-94012)

About this course:

Python® continues to be a popular programming language, perhaps owing to its ability to get a lot of work done in few lines of code, and its versatility. Python is useful for developing custom software tools, applications, web services, and cloud applications. In this course, you'll build upon your basic Python skills, learning more advanced topics such as object-oriented programming patterns, development of graphical user interfaces, data management, threading, unit testing, and creating and installing packages and executable applications.

The average salary for Python Developer is **\$115,222** per year.

Course Objectives:

- Create object-oriented Python applications.
- Design and create a GUI.
- Store data in a database from Python applications.
- Communicate using client/server network protocols.
- Manage multiple processes with threading.
- Implement unit testing.
- Package an application for distribution.

Audience:

- This course is designed for existing Python programmers who have at least one year of Python experience and who want to expand their Python proficiencies.

Prerequisites:

- You should have experience with object-oriented programming and Python

Course Outline:

Lesson 1: Using Object-Oriented Python

Topic A: Create and Use Classes in an Application

Topic B: Use Magic Methods

Topic C: Incorporate Class Factories

Lesson 2: Creating a GUI

Topic A: Design a GUI

Topic B: Create and Arrange a GUI Layout

Topic C: Interact with User Events

Lesson 3: Using Databases

Topic A: Basics of Data Management

Topic B: Use SQLite Databases

Topic C: Manipulate SQL Data

Lesson 4: Network Programming

Topic A: Basics of Network Programming

Topic B: Create a Client/Server Program

Lesson 5: Managing Multiple Processes with Threading

Topic A: Create a Threaded Application

Topic B: Manage Thread Resources

Lesson 6: Implementing Unit Testing

Topic A: Test-Driven Development

Topic B: Write and Run a Unit Test Case

Topic C: Create a Test Suite

Lesson 7: Packaging an Application for Distribution

Topic A: Create a Package Structure

Topic B: Generate the Package Distribution Files

Topic C: Generate a Windows Executable

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through

Credly.
