**Course Duration: 4 Days**

## **RHEL8 New Features for Experienced Linux Administrators (RH354VT)**

### **About this course:**

**Prepare yourself for Red Hat Enterprise Linux 8 by learning about changes to the operating system**

Red Hat Enterprise Linux 8 New Features for Experienced Linux Administrators (RH354) introduces you to updates in the upcoming Red Hat® Enterprise Linux® release. Intended for experienced Linux system administrators, this course offers a rapid orientation to Red Hat Enterprise Linux 8 based on the pre-release beta. The offering prepares operators, managers, principal system administrators, and other IT professionals with experience in Red Hat Enterprise Linux 7 for deployments and migrations to the new release.

This course is based on Red Hat Enterprise Linux 8.

## **Course Objective:**

- Install Red Hat Enterprise Linux 8 using the new packaging, modularity, and appstream features.
- Upgrade from Red Hat Enterprise Linux 7 to Red Hat Enterprise Linux 8 using new tools.
- Perform integrated file system and volume management using Stratis.
- Use Cockpit for system management.
- Create system images with Composer.
- Configure Identity Management using authselect.
- Understand the Wayland graphical display server.
- Deploy containers using the new integrated OCI runtime and tools.
- Configure firewall rules that use the new NFT back end.

## **Audience:**

This course is designed to provide a preview of Red Hat Enterprise Linux 8 to experienced IT professionals, including:

- Linux system administrators
- DevOps engineers
- Cloud administrators

## **Prerequisite:**

- Become a Red Hat Certified System Administrator (RHCSA), or demonstrate equivalent knowledge of and experience with Red Hat Enterprise Linux

## **Course Outline:**

### **Preview Red Hat Enterprise Linux 8**

Describe the major improvements and feature enhancements in the upcoming Red Hat Enterprise Linux 8 release.

### **Install and upgrade to Red Hat Enterprise Linux 8**

Install Red Hat Enterprise Linux 8 or upgrade an existing system from Red Hat

Enterprise Linux 7 to Red Hat Enterprise Linux 8.

### **Provision and manage servers**

Prepare standardized systems by generating system images for deployment, managing them with remote web-based administration, and automating provisioning with Red Hat Enterprise Linux System Roles for Red Hat® Ansible Engine.

### **Adapt to core system changes**

Manage core system components that have had significant changes in Red Hat Enterprise Linux 8.

### **Implement storage using new features**

Explore the major enhancements in local and remote file system and volume management components.

### **Manage containers with the new runtime**

Explain the new container runtime engine and tools that replace the Docker container engine.

### **Implement enhanced networking features**

Describe the major enhancements in network packet processing and network device management.

### **Adapt to virtualization improvements**

Learn to implement the new features and management tools for virtualization management.

## **Credly Badge:**

### **Display your Completion Badge And Get The Recognition You Deserve.**

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific

skills you developed.

Badges are issued by QuickStart and verified through Credly.
